Features and Mechanics of the Game

Real-Time Graph: BetChill's games feature a constantly moving graph that rises and falls in real-time, similar to stock trading. The graph represents the points generated by the teams based on their performance on the field. This dynamic element keeps players engaged and adds an unpredictable aspect to the game.

Score Boosters - Circles: Each action, such as pass, goal, tackle, corner, and more, is represented by a circle that increases in points as time goes on. This mechanism adds excitement and anticipation, as players eagerly await the next opportunity for their chosen team to perform the action and collect the points.

Cash Out Option: BetChill provides a cash-out feature that allows players to cash out their bets at any time during the match. This adds a strategic element to the gameplay, enabling players to manage their risks and secure winnings before the game ends.

Automatic Bet End: Take control of your betting experience with BetChill's Automatic Bet End feature. Whether you want to set a loss limit, win limit, or a timer for automatic cash-out, our platform allows

you to customize when your bets end. Sit back, relax, and enjoy the suspense until your chosen threshold is reached. With Automatic Bet End, you can maximize your enjoyment and have peace of mind knowing your bets will end according to your preferred conditions.
